

## ROUGH IDEA

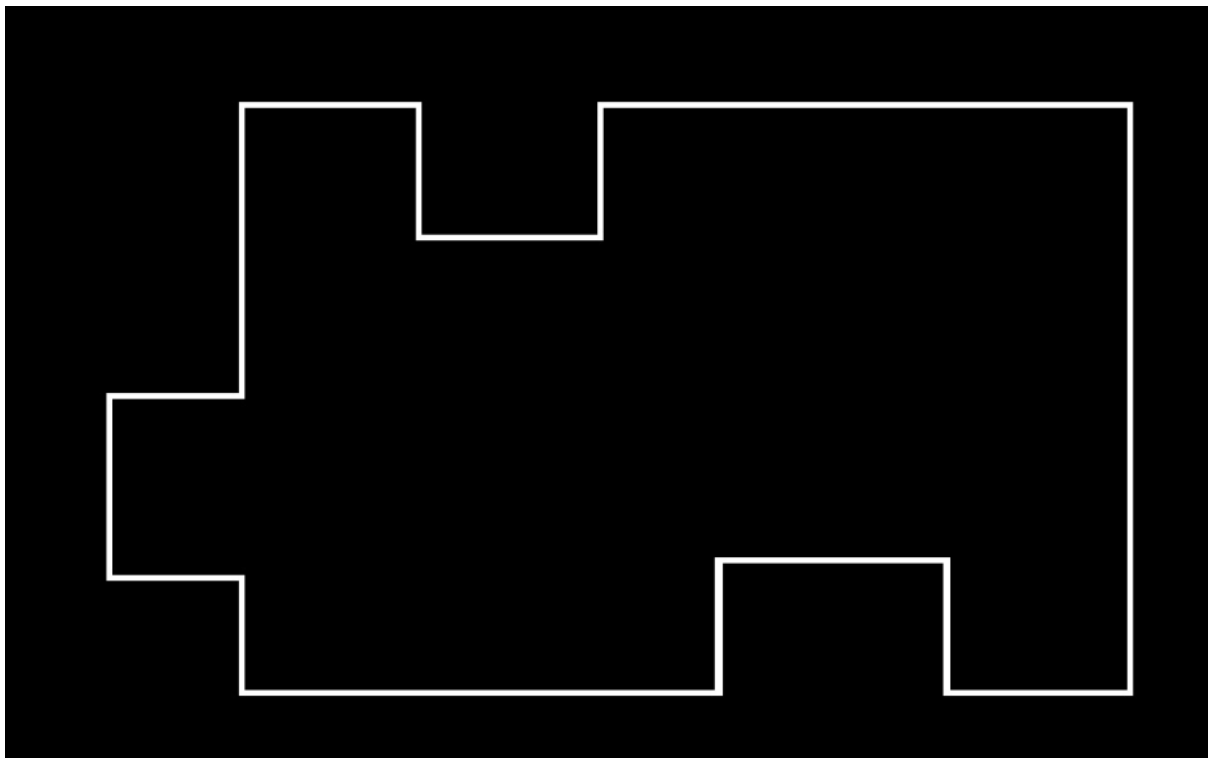

Keep a main page

Let the main page have some designs like a designed and well furnished room, wall with paintings or frames, a living room with dining table, a kids play room etc 5-6 same examples

This should be there regardless of whether a person has an account made or not

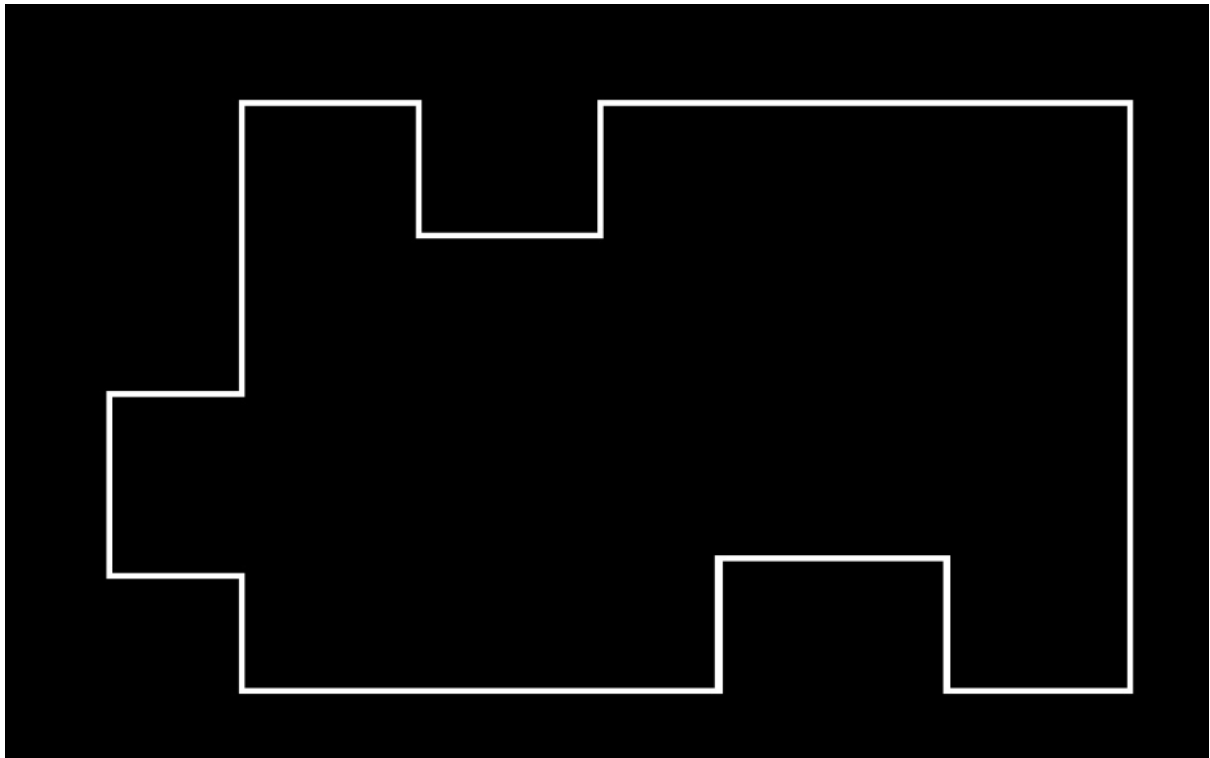

Next step is make account.

Then the website will have sort of a bar on the left which will ask you to input 2d shape of room like this

Ask for what is there in surrounding area

Where window is where chajja is

Then ask which accessories you would like to have in your room

Bed

Wadrobe

Mirror

Desk

Lamp

Couch

Chair

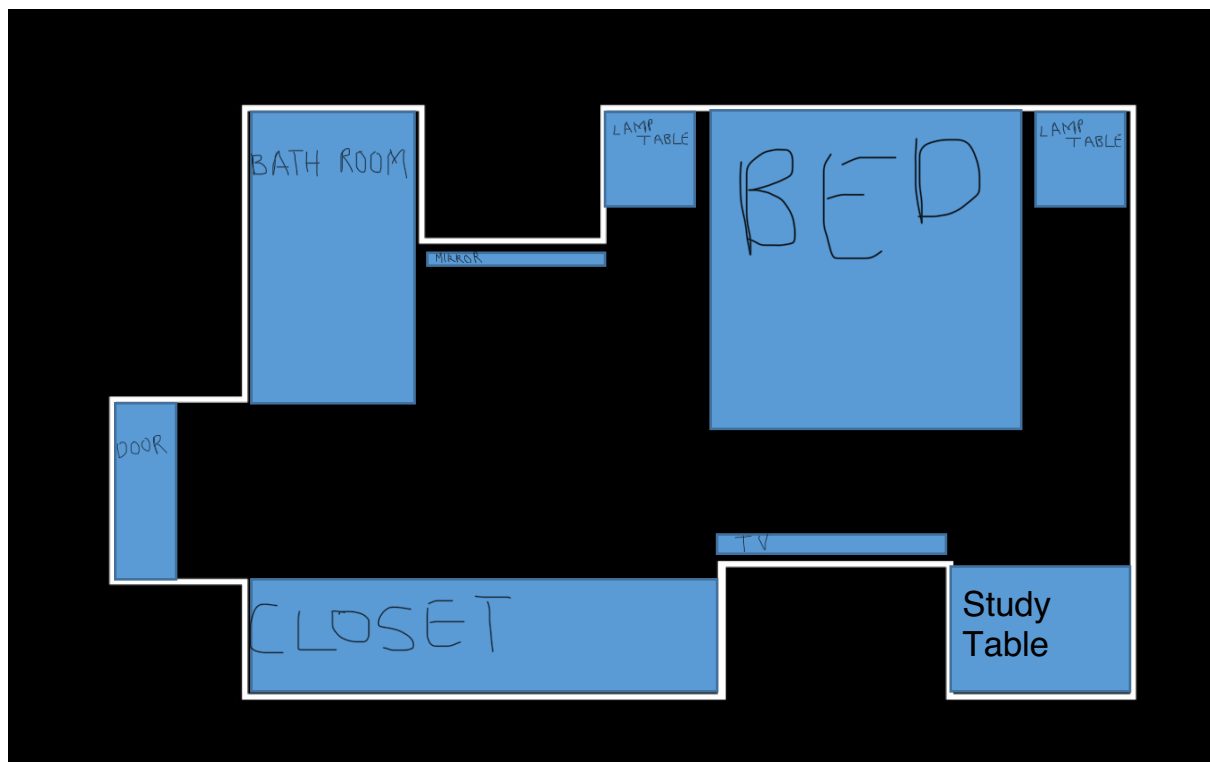

Hangings

Curtains

Let the user select options

Then proceed to generate an output

Output will be something like

After this there will be like bed suggesting, mirror suggesting, paint suggesting etc a combination/ combinations would be suggested and the user must choose.

If you choose to select a single bed/ double bed then it would suggest that as well with some price filtering.
